

# INTERNET MONEY (IM)

Deflationary Peer to Peer "Digital Cash". It's money, on the internet.

## Blackpaper v4.0

The plain English version.

# Abstract

Internet Money (IM) was created to serve as a form of peer to peer "digital cash". The contract is simple: you can buy, sell, send and burn IM. Internet Money has no admin keys, no taxes, no reflections and is deflationary.

Internet Money was launched on Binance Smart Chain (BSC) on November 30th, 2021. It currently runs on BSC and PulseChain testnet. You can purchase IM on BSC via [PancakeSwap](#). Holders of IM on BSC will get a 1:1 copy of IM on PulseChain mainnet and Ethereum when IM is deployed on those chains.

In our modern societies, most financial systems operate in such a way that those who already control the wealth, maintain their wealth and continue to drain more wealth from the system. Or further their wealth by printing more of the currency. Internet Money aims to solve this major problem that plagues other financial ecosystems. How? Internet Money is deflationary. Which means that less and less IM will exist over time. Making the IM you hold today, rarer in the future. This feature, aims to rival inflation, the devaluing of your money over time. As Internet Money garners adoption, it's possible you will have more buying power for goods and services with the same IM you hold in this moment. With our approachable branding, clean design, and deflationary nature, we believe Internet Money can see mass adoption in both the physical world and the metaverse. Changing how humans utilize money as we know it.

Cryptocurrency was created to be a decentralized way to interact with money. We aim to take continual steps towards the decentralization of every facet of the Internet Money ecosystem; because we believe this is the way money should be:

No centralized entities.

No controlling forces.

Power in the hands of the people.

# Tokenomics

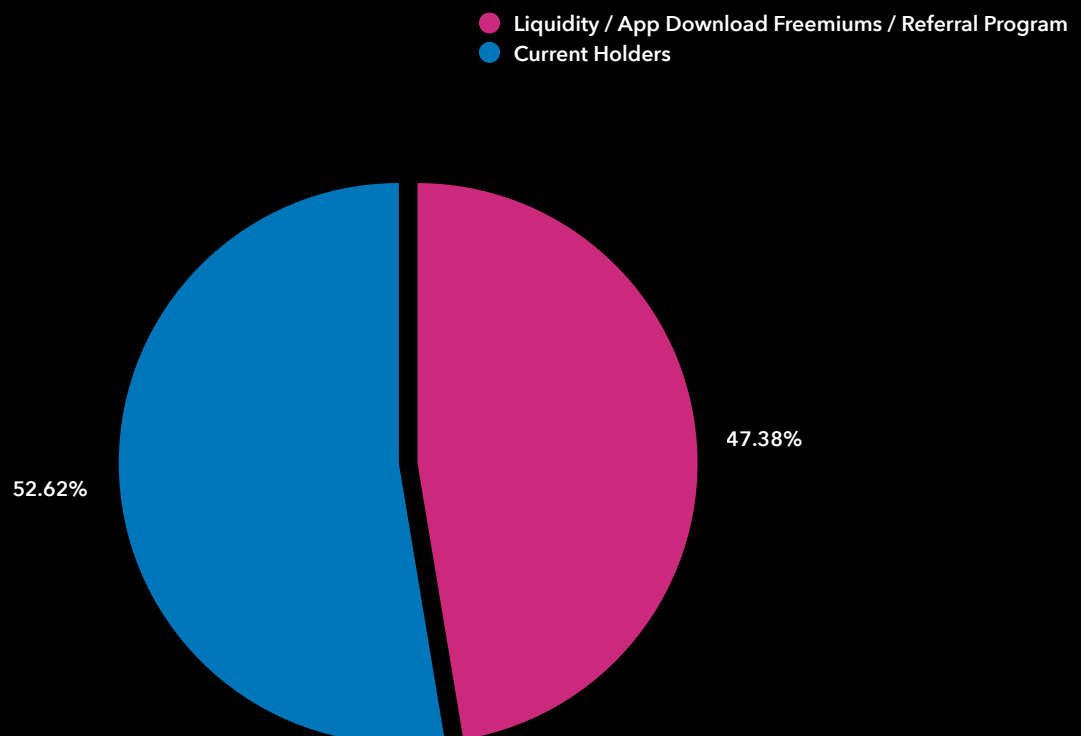

## Distribution

When IM launched, it started with a supply of 420 trillion. Since then just over 410 trillion have been burned (see here). There are currently a total of 9,846,560,365,628 (just under 10 trillion) IM tokens. The current distribution of the tokens are outlined in the pie chart below. The pie chart will be broken down further after the launch of IM on Ethereum and PulseChain mainnet. Due to the deflationary nature of IM (Buy and Burn), this number will decrease over time.

**Current Holders:** All holders of IM on Binance Smart Chain (BSC).

**Liquidity:** This wallet is currently the top IM holder and is referred to as the "Vault". This wallet will be used to add initial liquidity on Ethereum and PulseChain mainnet, when IM is deployed on those chains.

**App Download Freemiums / Referral Program:** When a user downloads the Internet Money Wallet app, they will be able to claim free IM. If a user refers another user to download the Internet Money Wallet app, the affiliate (referrer) will earn IM and the downloader (referee) will receive a bonus in the IM they are eligible to claim.

## Buy and Burn

(See [Internet Money Wallet Dividend Blackpaper](#) for more information)

A wallet holding Internet Money Wallet Dividend (WD) on Ethereum, BSC and PulseChain will accrue ETH, BNB & PLS. That ETH, BNB & PLS will be used to buy IM off of the open market on their respective chains. The purchased IM will be immediately burned thereafter. These purchases will happen at random times, in random amounts.

## Buy and Burn Flow

# Internet Money Founders

## KG, Founder

Crypto investor, ecosystem creator, father, husband, team leader, community builder, owner of a successful real estate business, philosopher and poet are some of what KG considers to be, his most prideful attributes. He is very active in and passionate about the crypto space. He believes in its ability to create financial freedom (in every aspect of the ideal) and is building tools to help make crypto become a part of our mainstream society; accessible by all.

## Don Montoya, Co-Founder

A U.S. Army Veteran and dedicated father of four, Don has a unique blend of sales, marketing and project management skills based on decades of experience in the entertainment and construction industries. Don prides himself on his ability to start, manage, and carry large scale projects through to completion. Hooked since 2016 on the intricacies of the crypto space, Don is passionate about advancing the adoption of cryptocurrency, especially focused on privacy and security.

## Failure is not an option.

The level of dedication, motivation and sincerity that exist within the IM team cannot easily be conveyed in words. Our drive and determination have already proven themselves. To bring our project to the point it is at today, countless hours have been put into it. There is no obstacle we can not overcome. We see only the objective, the obstacles must give way. We are committed to seeing this project manifest, to strengthening the PulseChain ecosystem and helping to liberate our fellow humans from oppressive financial systems by giving them an easy, user-friendly experience in the crypto space. We will inevitably face hurdles and hardships, but there is nothing that can deter us from our path.

No taxes.  
Deflationary.  
No admin keys.  
No reflections.  
Committed to decentralization.  
Easy to understand concept.  
Game theory to keep experts engaged.  
Amazing dev team.  
Great branding.

**\*DISCLAIMERS\***

**\*You must have no expectations of profit from the work of others\***

**\*Statements expressed in this Blackpaper represent our intentions of what we aim to develop.\***

**Internet Money is revolutionary.**
