Abstract

The Internet Money Ecosystem Dividend "T.I.M.E. Dividend" (TIME) is the first token of its kind. TIME was created to serve as a form of decentralized passive income. The concept is simple. Depending on which chain you hold TIME on, you earn passive income in the form of that blockchains native coin. For example, if you hold TIME on PulseChain, you will earn passive income in the form of PLS. If you hold TIME on Ethereum, you will earn passive income in the form of ETH. The TIME smart contract is immutable, has no admin keys, no taxes, no reflections and with a total supply of 2 billion TIME per blockchain, there is no risk of dilution due to inflation.

Most crypto ecosystems that afford you the opportunity to earn passive income, require some layer of complexity or "loss" in order to earn. With TIME, there is no need for staking, delegating or locking up your tokens. Simply hold your TIME tokens in an address you own the private keys to, and claim your payouts of a blockchains native coin as frequently as every block.

We believe all humans are entitled to their time. That in this world, freedom of time is a basic human right. That's why, as opposed to other crypto wallets, the Internet Money Wallet is sharing its revenue. All fees generated from swaps on a given blockchain within the Internet Money Wallet will be distributed to TIME holders on their respective chains.

We believe this is how crypto should be, therefore, we are setting the precedent.
By the people, for the people. Attaining financial freedom, together.

Earn Passive Income.
Free Your Time.

PulseChain / Ethereum / BNB Smart Chain (BSC)

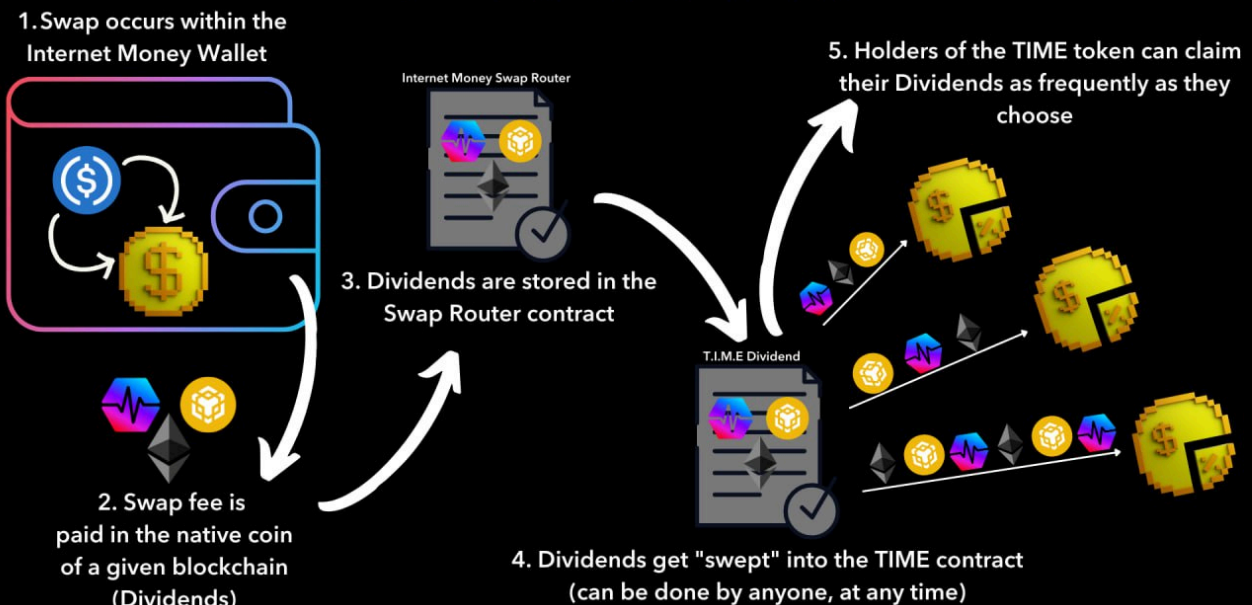

The Best Passive Income Stream In Crypto

The Internet Money Wallet will charge fees when swapping from one asset to another within the wallet (like Metamask and other crypto wallets). A fee of 0.729% will be charged on every swap performed within the wallet. Depending on the blockchain you are transacting on, the fee will be charged in the form of that blockchains' native coin.

100% of fees are distributed to TIME holders. Holders of the TIME token will get a portion of the fees generated by the Internet Money Wallet on the respective blockchain the TIME is held (proportional to their holdings). To calculate your percentage of the pool, you can divide how many TIME tokens you have by the total supply (2 billion) and multiply it by 100 to know your percent of the pool. Example: $1m \text{ TIME} / 2b \text{ TIME} = 0.0005$. Now take that 0.0005 and multiply it by 100, which equals 0.05% of fees (your position).

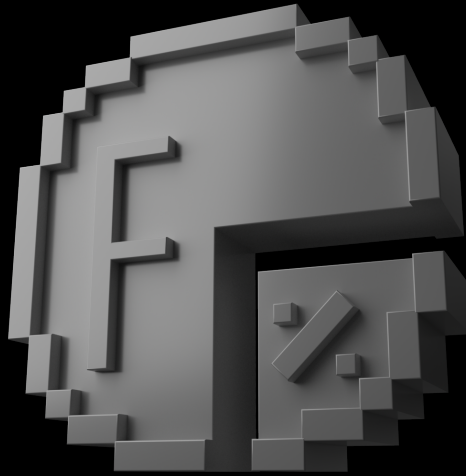

Fees will be claimable as frequently as every block, and can accumulate as long as you see fit. You will not have to stake, delegate, or lock your TIME up in any way. By simply holding TIME, you will be earning passive income in the form of that blockchains native coin.

TIME FLOW

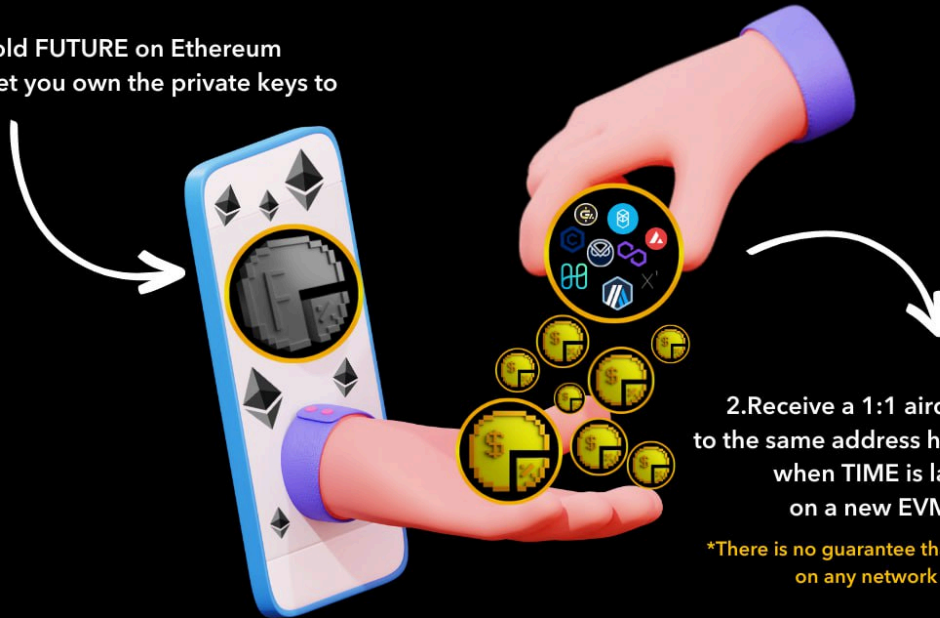

FUTURE T.I.M.E. DIVIDEND (FUTURE)

Future T.I.M.E. Dividend (FUTURE) exists on Ethereum only. When TIME is launched on a new EVM chain, holders of FUTURE on Ethereum will be airdropped TIME on the new chain to the same address at a rate of 1:1. In order to receive your airdrop, you must hold your FUTURE in a non-custodial wallet. With a total supply of 2 billion FUTURE tokens, there is no risk of dilution due to inflation.

FUTURE FLOW

1. Hold FUTURE on Ethereum
in a wallet you own the private keys to

2. Receive a 1:1 airdrop of TIME
to the same address holding FUTURE
when TIME is launched
on a new EVM chain

**There is no guarantee that TIME launches
on any network shown**

Internet Money Founders

KG, Founder

Crypto investor, ecosystem creator, father, husband, team leader, community builder, owner of a successful real estate business, philosopher and poet are some of what KG considers to be, his most prideful attributes. He is very active in and passionate about the crypto space. He believes in its ability to create financial freedom (in every aspect of the ideal) and is building tools to help make crypto become a part of our mainstream society; accessible by all.

Don Montoya, Co-Founder

A U.S. Army Veteran and dedicated father of four, Don has a unique blend of sales, marketing and project management skills based on decades of experience in the entertainment and construction industries. Don prides himself on his ability to start, manage, and carry large scale projects through to completion. Hooked since 2016 on the intricacies of the crypto space, Don is passionate about advancing the adoption of cryptocurrency, especially focused on privacy and security.

Failure is not an option.

The level of dedication, motivation and sincerity that exist within the IM team cannot easily be conveyed in words. Our drive and determination have already proven themselves. To bring our project to the point it is at today, countless hours have been put into it. There is no obstacle we can not overcome. We see only the objective, the obstacles must give way. We are committed to seeing this project manifest, to strengthening the PulseChain ecosystem and helping to liberate our fellow humans from oppressive financial systems by giving them an easy, user-friendly experience in the crypto space. We will inevitably face hurdles and hardships, but there is nothing that can deter us from our path.

No taxes.
No admin keys.
No reflections.
Fixed supply.
Easy to understand concept.
Game theory to keep experts engaged.
Amazing dev team.
Great branding.
The best passive income stream in crypto history.
Earn a blockchains' native asset.
